

About Us

ClearRTB leads the standard in honest and transparent ad campaign services. We use patented relevancy technology and publish our data and methods for the benefit of the marketer.

Our Thesis

During the last 4 years programmatic advertising has become a perfected art and passion for our organization. We've experienced both success and failure, have learned along the way, and our story continues as we endeavor to take care of our clients the best way we know how.

We have a unique industry perspective that stems from our vast experience and operations along side our competitors. The truth is that there is a lot of money being wasted, swelled up by high margins that the agency, publisher, and advertiser rarely even see. It's an injustice that we aim to remedy.

The solution is a flat rate pricing model coupled with transparent data to the marketing organizations.
